

4-1 • Guided Problem Solving

GPS Student Page 201, Exercise 30

Algebra Find the values of the variables.

Read and Understand

1. What kind of triangles are $\triangle ABC$ and $\triangle KLM$? _____
2. Which angles and side length are given? _____
3. What does the statement $\triangle ABC \cong \triangle KLM$ mean? _____
4. What variables are used in this problem? _____

Plan and Solve

5. From the Triangle Angle-Sum Theorem, what is $m\angle C$? _____
6. Use the fact that the two triangles are congruent to find $m\angle K$ _____ and $m\angle M$. _____
7. What equation can be used to solve for x ? _____
8. What is the value of x ? _____
9. Use the fact that the two triangles are congruent to find LK . _____
10. What equation can be used to solve for t ? _____
11. What is the value of t ? _____

Look Back and Check

12. Compare $m\angle A$ and $m\angle C$, and compare $m\angle K$ and $m\angle M$. Do your findings match the physical appearance of the figure? Explain. _____

Solve Another Problem

13. Suppose $m\angle A$ is 30. Find the $m\angle M$. _____
