$\qquad$ Period:

I can identify and perform transformations to quadratic functions

1) Complete the table at the right for $f(x)=x^{2}$. This is the parent graph for the quadratic function. $\boldsymbol{A} \boldsymbol{L} \boldsymbol{L}$ transformations are based off this one.

Graph $f(x)$ on the grid at the right.

| $x$ | $f(x)$ |
| :--- | :--- |
| -3 |  |

2) Describe the transformation of $g(x)=x^{2}+4$ from $f(x)=x^{2}$

Apply this transformation to each point in the $f(x)$ table to create the new $g(x)$ table. Use the table to graph $g(x)$ on the grid at the right.

3) Describe the transformation of
$h(x)=x^{2}-4$ from $f(x)=x^{2}$.

Apply this transformation to each point in the $f(x)$ table to create the new $h(x)$ table. Use the table to graph $h(x)$ on the grid at the right.

| $x$ | $h(x)$ |
| :--- | :--- |
|  |  |

4) Describe the transformation of $r(x)=(x-2)^{2}$ from $f(x)=x^{2}$.

Apply this transformation to each point in the $f(x)$ table to create the new $r(x)$ table. Use the table to graph $r(x)$ on the grid at the right.

5) Describe the transformation of $t(x)=(x+2)^{2}$ from $f(x)=x^{2}$.

Apply this transformation to each point in the $f(x)$ table to create the new $t(x)$ table. Use the table to graph $t(x)$ on the grid at the right.

6) Describe the transformation of $n(x)=-x^{2}$ from $f(x)=x^{2}$.

Apply this transformation to each point in the $f(x)$ table to create the new $n(x)$ table. Use the table to graph $n(x)$ on the grid at the right.

| $x \quad n(x)$ | $y$ |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\cdots \quad n(x)$ | $\square$ | $\underline{\square}$ |  | $\uparrow$ | 1 |  |  |  |  |  |  |
|  |  |  |  | 8 |  |  |  |  |  |  |  |
|  | - | $\bigcirc$ | $\bigcirc$ | ${ }^{8}$ |  |  |  |  |  |  |  |
|  | $\square-$ | - |  | 6 |  |  |  |  |  |  |  |
|  |  |  |  | 6 |  |  |  |  |  |  |  |
|  |  |  |  | 4 |  |  |  |  |  |  |  |
|  |  |  |  | 4 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | - |  | 2 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  | -2 | 0 | 2 | 4 | 6 |  | 8 |  |
|  | - |  |  | -2 |  |  |  |  |  |  |  |
|  | - |  |  | -2 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  | ${ }^{4}$ |  |  |  |  |  |  |  |
|  |  |  |  | -6 |  |  |  |  |  |  |  |
|  |  |  |  | ${ }^{6}$ |  |  |  |  |  |  |  |
|  |  |  |  | -8 |  |  |  |  |  |  |  |
|  |  |  |  | ${ }^{8}$ |  |  |  |  |  |  |  |
|  |  |  |  | $\downarrow$ | , |  |  |  |  |  |  |
