

Directions for “Measure and Classify Shapes Handout”
 [Color Code parts which are congruent]

- 1) Measure and label all sides (**cm**) to the nearest tenth
- 2) Measure all interior angles
- 3) Use marks to indicate:

Congruent sides	Congruent angles
	
Parallel Lines	Right Angles
	

- 4) Classify each shape in as many names as possible [quadrilateral, kite, trapezoid, isosceles trapezoid, parallelogram, rectangle, rhombus, square]
- 5) Draw each diagonal and measure (**cm**) to the nearest tenth
- 6) Measure the angles formed by the diagonal
